SKILLS

JavaScript

React

Redux

HTML5

CSS3

Sass

Styled Components

Node

Express

SQL

Git

PROJECTS

Talko

Team Project | <http://talko.io> ↗

React | Node | Express | Socket.io | Styled Components

- Built live chat components for React developers to easily integrate in their projects
- Built a customizable chat modal with different themes
- Built a component to list a customer every time a socket connection is established with the ability to create tabs and toggle between different customer's chats
- Wrote documentation with explanation of our code and directions on how to implement our technology through npm

Business Expense Application

Personal Project | <http://businessexpenses.com> ↗

React | Redux | Node | Express | Sass | SQL | Amazon S3

- Made an application for employees to submit expenses to an employer to have them approved or denied with updated Account balances
- Sent email notifications to the employer every time an expense was submitted
- Built in functionality to upload receipts with Amazon S3

JavaScript Breakout Game

Personal Project | <http://breakoutjs.net> ↗

HTML5, Canvas, JavaScript

- Built a game with JavaScript to break bricks by hitting a ball with a paddle using a mouse or keyboard controls
- Made a step-by-step tutorial to show others how to make this game with JavaScript
- Covered canvas animations, collision detection, start and end game status, power ups, and paddle controls
